Career and Technical Student Organizations

Empower each child to design the future.

Our vision at LTC is that we will empower each student to be leaders and innovators in his or her community and career. Our mission is Building our community through career preparation focused on character, creativity, and craftsmanship.

All students, regardless of circumstances, advance on time, prepared to graduate and ready to enter college, the military or industry with certification.

At LTC, we believe Career and Technical Education is for ALL students. Every student will enter a career at some point, whether that be through college, the military, or on-the-job training. Therefore, CTE is valuable for ALL students to explore potential careers and find their interests while still in high school

Teaching and learning develop power skills in all students.

At LTC, one of our focuses is Character. Business and industry partners tell us constantly that individuals with soft skills and strong character are highly employable and easily trainable, so that the organization can accomplish its goals. We strive to develop students who have strong character and are valuable members of society.

Our schools are service-oriented centers of learning, committed to family and community partnerships.

At LTC, we have Career and Technical Student Organizations (CTSOs). Through our CTSOs, we are involved in many various community service projects. Our mission is also to grow our community. This extends beyond graduation. Many current Lexington County business and industry members were successful students at Lexington Technology Center.

Every adult will be equipped with the skills and resources necessary to advocate for and ensure the success of all students.

At LTC, it is our goal to ensure that each instructor has the resources and skills to provide state of the art instruction to our students. This may be training on career specific instructional practices, purchasing and training for industry level equipment, support in obtaining industry certifications, and much more.
